

Alexander Claes

Resume

Work experience:

Mar 2019 - now: Frontend Developer at Avail (e-commerce start-up)

Responsible for the client-side react application for a fashion e-commerce platform. Using tools like Webpack with code splitting and Redux for optimal performance and speed. Collaborated closely with both designers for iterations, back-end developer for structure, and fashion-minded colleagues for feedback.

Oct 2016 - Apr 2019: Frontend Developer at Omakase (web agency)

When I graduated I took a job at Omakase, and shifted more towards front-end development (still within Ruby on Rails). Two examples of the projects I worked on are an online field hockey platform (<https://scorrd.com/>) and an assignment for Goedele Liekens, a famous Belgian sexologist (<https://worldwide-wet.com/>).

Feb 2016 - May 2016: Intern at DigiTi (web agency)

During my internship I built a Ruby on Rails application which allowed multiple companies from the same building to order lunch from a restaurant. It's still in use today at www.letsorderit.be.

Education:

2012 - 2016: Karel de Grote - Multimedia and Communication Technologies

I attained my professional bachelor at Karel de Grote. The course curriculum included web development, programming, design and usability

Skills:

- React
- Redux
- Webpack
- TTD with Jest & Enzyme
- Ruby on Rails
